SUMMARY

Master's student in Informatics and Computing Engineering at FEUP, looking for a software development internship. Communicative and organized, with experience mentoring and supporting other students.

EXPERIENCE

Fraunhofer Portugal AICOS Feb. 2026 – Jul. 2026
Student Intern – Integrated Project (Capstone) Porto, Portugal

- Built a smart inventory system in a team of four students: e-paper tags (ESP32, OpenEPaperLink, Home Assistant) that update automatically when an InvenTree stock location changes, showing the drawer name and a QR code.
- Developed the backend integration (InvenTree plugin and Home Assistant automation via REST API) and the Android app (React, Capacitor) that scans the QR code to view and edit stock.
- Designed the system architecture and validated the prototype with stakeholders.

B-SIMPLE Jul. 2022 – Dec. 2023
Software Developer – Work-Based Training Porto, Portugal

- Completed a 400-hour internship (FCT) covering requirements gathering, system design and implementation.
- Designed and developed an internal web application (Angular, .NET API, SQL) that lets employees request and manage their vacations and see the whole company's schedule, built at my supervisor's request.

EDUCATION

Faculdade de Engenharia da Universidade do Porto Set. 2026 – Current
Master's in Informatics and Computing Engineering Porto, Portugal

Faculdade de Engenharia da Universidade do Porto Set. 2023 – Jul. 2026
Bachelor's in Informatics and Computing Engineering Porto, Portugal

Colégio Internato dos Carvalhos Set. 2020 – Jul. 2023
Science and Technology Program (Informatics) Portugal

ACTIVITIES

Projeto FEUP Set. 2026 – Current
